SUMMARY

Computer Science student at Polytechnic University of the Philippines focused on backend development, APIs, databases, and algorithmic systems. Built Laravel, FastAPI, Java, React, and Supabase projects across academic and team environments, including disaster-response routing work presented at WCTP 2025. Strong foundation in data structures, database systems, MVC architecture, authentication, and practical software delivery.

TECHNICAL SKILLS

Languages: Java, C, PHP, Python, TypeScript, JavaScript, SQL

Backend & APIs: Laravel, FastAPI, REST APIs, Laravel Sanctum, Supabase, MVC Architecture

Databases: PostgreSQL, MySQL

Frontend: React, Next.js, Blade Templates, Bootstrap, Tailwind CSS

Tools: Git, GitHub, Maven, Docker, Postman, Vite

ML & Data Science: PyTorch, Hugging Face, Scikit-Learn, Pandas, NumPy, NLP

PROJECTS

PUP School Enrollment System | Backend / Full-Stack Developer | Laravel, Supabase, PostgreSQL | github.com/tzuyu10/G8-School-Enrollment-System

- Built role-based enrollment workflows using Laravel 13, Laravel Sanctum API authentication, Blade Templates, Bootstrap, and Supabase PostgreSQL.
- Modeled a 17-table database covering users, roles, academic years, semesters, colleges, programs, sections, subjects, applications, and enrollments.
- Implemented registrar/admin approval flows for section assignment, automatic subject enrollment, rejection remarks, and semester-scoped student records across 14 PUP colleges and 59 programs.

Bantay | Full-Stack Developer | React, Python, FastAPI | github.com/PMT-BANTAY/bantay-demo

- Built a real-time flood propagation monitoring system integrating DOST/PAGASA-related data through FastAPI service endpoints.
- Implemented BFS and Dijkstra-based logic for flood simulation, evacuation route optimization, and disaster response scenarios.
- Collaborated with a 9-person team; project work was presented at WCTP 2025.

Microaggression Detector | Backend Developer / ML | Python, XLM-RoBERTa, NLP

- Fine-tuned an XLM-RoBERTa model using a self-curated and processed dataset of 6,000 unique Taglish language entries based on Sue's taxonomy.
- Built a CLI inference pipeline that classifies text into microassault, microinsult, microinvalidation, and non-microaggression categories.
- Returned per-class probability scores to make classification output easier to inspect and evaluate.

EAC Compiler | Backend Developer | C | github.com/eac-language/eac

- Built compiler front-end components for a custom Python-derived language using C.
- Owned parser implementation and grammar validation behavior for .eac source files.
- Assisted lexer development, token output validation, and syntax error detection.

Isconnect | Backend Developer | Java, PostgreSQL, MVC | github.com/JpCurada/isconnect

- Engineered backend infrastructure for a desktop educational resource-sharing application using Java and PostgreSQL.
- Implemented authentication, data validation, and role-aware workflows using MVC architecture.
- Collaborated with a 7-person team to improve database-backed workflows and application performance.

ADDITIONAL PROJECTS

- **BirthCertify:** Built React.js and Supabase workflows for certificate requests, status tracking, admin review, and voucher handling. | github.com/tzuyu10/BirthCertify-G9
- **ScamSentry:** Contributed TypeScript finite-state automata logic for scam text detection and probability scoring.
- **WebtoonHub:** Built a FastAPI-backed content aggregator with normalized data retrieval from external APIs.

PUBLICATION / PRESENTATION

PROJECT BANTAY: Breadth-First Search and Dijkstra Implementation for Community-Accessible Disaster Response | Special Contributor | WCTP 2025 | atlantis.press.com/proceedings/wctp-25/126023805

- Contributed to disaster-response algorithm work presented at the 14th Workshop on Computation: Theory and Practice.

EDUCATION

Polytechnic University of the Philippines | Bachelor of Science in Computer Science | Expected 2027

- **Academic distinction:** President's List and Dean's List
- **Relevant Coursework:** Object-Oriented Programming, Database Management Systems, Data Structures and Algorithms, Automata and Language Theory, Natural Language Processing

CERTIFICATIONS & AFFILIATIONS

- Data Literacy Certification | DataCamp | July 2025 | datacamp.com/skill-verification/DL0036995530047
- DataCamp Scholar | 2024 - Present
- GDG PUP Data and ML Cadet | 2024 - 2025
- GDG PUP Software Cadet | 2023 - 2024
- Cisco NetConnect PUP Networking Cadet | 2024 - 2025
